

Supercritical Fluid Nanotechnology: Advances and Applications in Composites and Hybrid Nanomaterials

Filesize: 8.49 MB

Reviews

The book is great and fantastic. It is written in straightforward words and phrases rather than difficult to understand. You won't really feel monotony at any time of your respective time (that's what catalogues are for regarding should you question me).

(Payton Miller)

SUPERCRITICAL FLUID NANOTECHNOLOGY: ADVANCES AND APPLICATIONS IN COMPOSITES AND HYBRID NANOMATERIALS

DOWNLOAD

To read **Supercritical Fluid Nanotechnology: Advances and Applications in Composites and Hybrid Nanomaterials** PDF, make sure you access the hyperlink listed below and save the file or have accessibility to additional information that are relevant to SUPERCRITICAL FLUID NANOTECHNOLOGY: ADVANCES AND APPLICATIONS IN COMPOSITES AND HYBRID NANOMATERIALS book.

Pan Stanford Publishing Pte Ltd. Hardback. Book Condition: new. BRAND NEW, Supercritical Fluid Nanotechnology: Advances and Applications in Composites and Hybrid Nanomaterials, Concepcion Domingo Pascual, Pascale Subra-Paternault, The environmental and climate program demands technological solutions in the chemical industry that incorporate prevention of pollution. Major advances are needed to reduce the use of organic solvents, such as methanol, toluene, xylene, methyl ethyl ketone, and dichloromethane, which account for 27 percent of total toxics release inventory chemicals. The replacement of those solvents is a key point to enable the transition from classical synthesis to green chemistry and nanotechnology concepts, i.e., to sustainability. The first radical option to achieve this goal is to completely avoid the use of solvents, as occurs in mechanochemical processes. A wide-range synthesis prospect is given by identifying between known solvents those with less negative environmental impact. This book concerns the analysis of the advantages of using compressed CO₂ to produce not only improved materials in a better way, but also new nanoproducts. Recovering and using CO₂, otherwise released into the atmosphere, is a means of recycling emissions resulting from other users. The use of supercritical CO₂ is a complex option from a conceptual point of view requiring enhanced technical preparation.
