In 2012, that percentage had increased to 18 . In the same manner, teenage obesity had increased from 5 to 21 in that particular time period. What is the difference between obesity and overweight? Overweight means that our body has extra body weight, due to water, bone, fat, muscle, or any of these combined factors for a particular and given height. On the other hand, obesity is concerned with just extra body fat. Millennium ago, the idea of children being obese was a rather rare phenomenon. They may have been overweight, because of lack of physical exercise and eating lots of food indiscriminately. But they were not obese, because they were not genetically conditioned to be so. Also, sedentary lifestyles at that time was not encouraged in children because, since childhood, they were trained to do hard physical labor, which they would continue for the rest of their lives. In many parts of the world, there are still societies which equate being fat and well-rounded with being prosperous. That is the reason why even now, mothers still stuff up their children, with lots and lots of...
